EDUCATION

Mukesh Patel School of Technology Management and Engineering <i>Bachelor of Technology in Computer Engineering CGPA: 3.46/4.00 (8.65/10.0)</i>	Mumbai, Maharashtra <i>Aug. 2022 – June 2026</i>
St. Cecilia's Public School <i>Class XII (PCM with Computer Science)</i>	New Delhi, Delhi <i>July 2022</i>
St. Cecilia's Public School <i>Class X</i>	New Delhi, Delhi <i>July 2020</i>

EXPERIENCE

Software Engineering Intern <i>BingePrime Media Pvt. Ltd.</i>	Jan. 2026 – Present <i>Mumbai, Maharashtra</i>
- Engineered a Video-on-Demand (VOD) pipeline POC using Java and FFmpeg for HLS transcoding and automated egress to Cloudflare R2 storage. - Upgraded a legacy React Native iOS application to support Apple Silicon, resolving deep dependency conflicts and compiler errors. - Collaborated on REST API endpoints and UI components, while independently debugging authentication modules and optimizing database configurations for large datasets.	

PROJECTS

CareerSync <i>Python, Django REST Framework (DRF), Django, SimpleJWT, PostgreSQL</i>	Present
Source Code: github.com/careersync - Built a headless REST API with Role-Based Access Control (RBAC) to separate Employer and Applicant workflows. - Implemented secure authentication using SimpleJWT to handle token validation and route permissions. - Developed a dynamic search feature using Django Q objects for multi-field keyword filtering. - Added server-side pagination for optimized API responses and created automated object slugification for clean URLs.	
Solo Finance Tracker <i>Python, Django, PostgreSQL, Clouinary, WhiteNoise, Render</i>	April 2026
Live Application: finance-tracker.com - Created a multi-tenant expense tracking platform with session authentication and database user isolation. - Designed an environment-aware settings configuration to automatically switch between local development and production. - Integrated Clouinary API for image uploads and utilized WhiteNoise to serve static CSS files efficiently on Render.	
Threadit <i>Python, Django, PostgreSQL, Gunicorn, Bootstrap, Render, Neon</i>	December 2025
Live Application: threadit.com - Developed a full-stack content aggregation platform utilizing Django's Model-View-Template (MVT) architecture. - Designed relational database schemas with Django ORM to handle nested commenting and post-voting logic. - Deployed the application on cloud infrastructure using Gunicorn to handle concurrent traffic against a PostgreSQL database.	

TECHNICAL SKILLS

Languages: Python, SQL
Backend Frameworks: Django, Django REST Framework (DRF)
Databases & Cloud: MySQL, PostgreSQL, Render, Clouinary, Neon, AWS, Cloudflare R2
Tools & Architecture: Git, GitHub, Postman, Gunicorn, REST APIs, JSON Web Tokens (JWT), Role-Based Access Control (RBAC)
