EDUCATION

MPSTME, MUMBAI

B.TECH. IN COMPUTER ENGINEERING
Grad. Jun 2026 | Mumbai, Maharashtra
CGPA: 8.58 (3.43/ 4.00)

12TH

ST. CECILIA'S PUBLIC SCHOOL

PCM WITH COMPUTER SCIENCE
Grad. May 2022 | New Delhi, Delhi

10TH

ST. CECILIA'S PUBLIC SCHOOL

Grad. May 2020 | New Delhi, Delhi

COURSEWORK

UNDERGRADUATE

Web Development
DataBase Management Systems
CyberSecurity
Cloud Computing
Object Oriented Programming
Operating Systems
Artificial Intelligence
Data Structures & Algorithms

SKILLS

PROGRAMMING

Languages:

- Advance: Python
- Intermediate: C++

Web Development Backend:

- Django, Django REST Framework (Learning)
- REST APIs
- HTML5, CSS3

Databases and other tools:

- SQL • PostgreSQL (Learning)
- Git and Github
- Tkinter

Cloud and Deployment

- AWS • Render • Cloudinary • Cloudflare services

EXPERIENCE

BINGEPRIME MEDIA PVT. LTD. | SOFTWARE ENGINEERING INTERN

Jan 2026 – Present | Mumbai, Maharashtra, India

- Engineering cross-platform features using **React Native** and **REST APIs**, optimizing mission-critical modules including authentication, subscription flows, and automated UI state management.
- Developing a high-performance **VOD and Live Streaming pipeline** using Quarkus (Maven), implementing FFmpeg transcoding from MP4 to HLS with automated egress to Cloudflare R2 storage.

STAR WELLNESS & CARE FOUNDATION | TEACHING ASSISTANT

May 2023 – June 2023 | New Delhi, Delhi, India

- Designed a curriculum including the Microsoft suite applications: MS Word, PowerPoint and Excel along with the basics of python.
- Delivered this content to a group of 10 students, increasing their profiles to get an entry level job title.

PROJECTS

SOLO FINANCE TRACKER | PERSONAL EXPENSE MANAGEMENT SYSTEM

PYTHON | DJANGO | POSTGRESQL | TAILWIND CSS | GIT | RENDER

- Built a secure multi-tenant expense tracking platform with custom user authentication, category management, and full CRUD functionality for financial records.
- Designed relational database architecture with strict user-level data isolation and implemented backend aggregation logic for real-time monthly spending summaries. Deployed production-ready application on Render with PostgreSQL integration.

- Link:// **SOLO FINANCE TRACKER**

THREADIT | CONTENT AGGREGATOR DISCUSSION PLATFORM

PYTHON | DJANGO | POSTGRESQL | HTML | CSS | GIT | BOOTSTRAP

- Engineering a feature-rich content aggregation platform modeled on Reddit, with a primary focus on secure backend architecture and API design.
- Architecting the relational database schema and implementing core planned features such as user authentication, community (subreddit) management, nested commenting, and post-voting logic.
